

COVID-19 Symptom Algorithm for Students

11/16/20†

Student is identified as experiencing any of the following signs or symptoms:

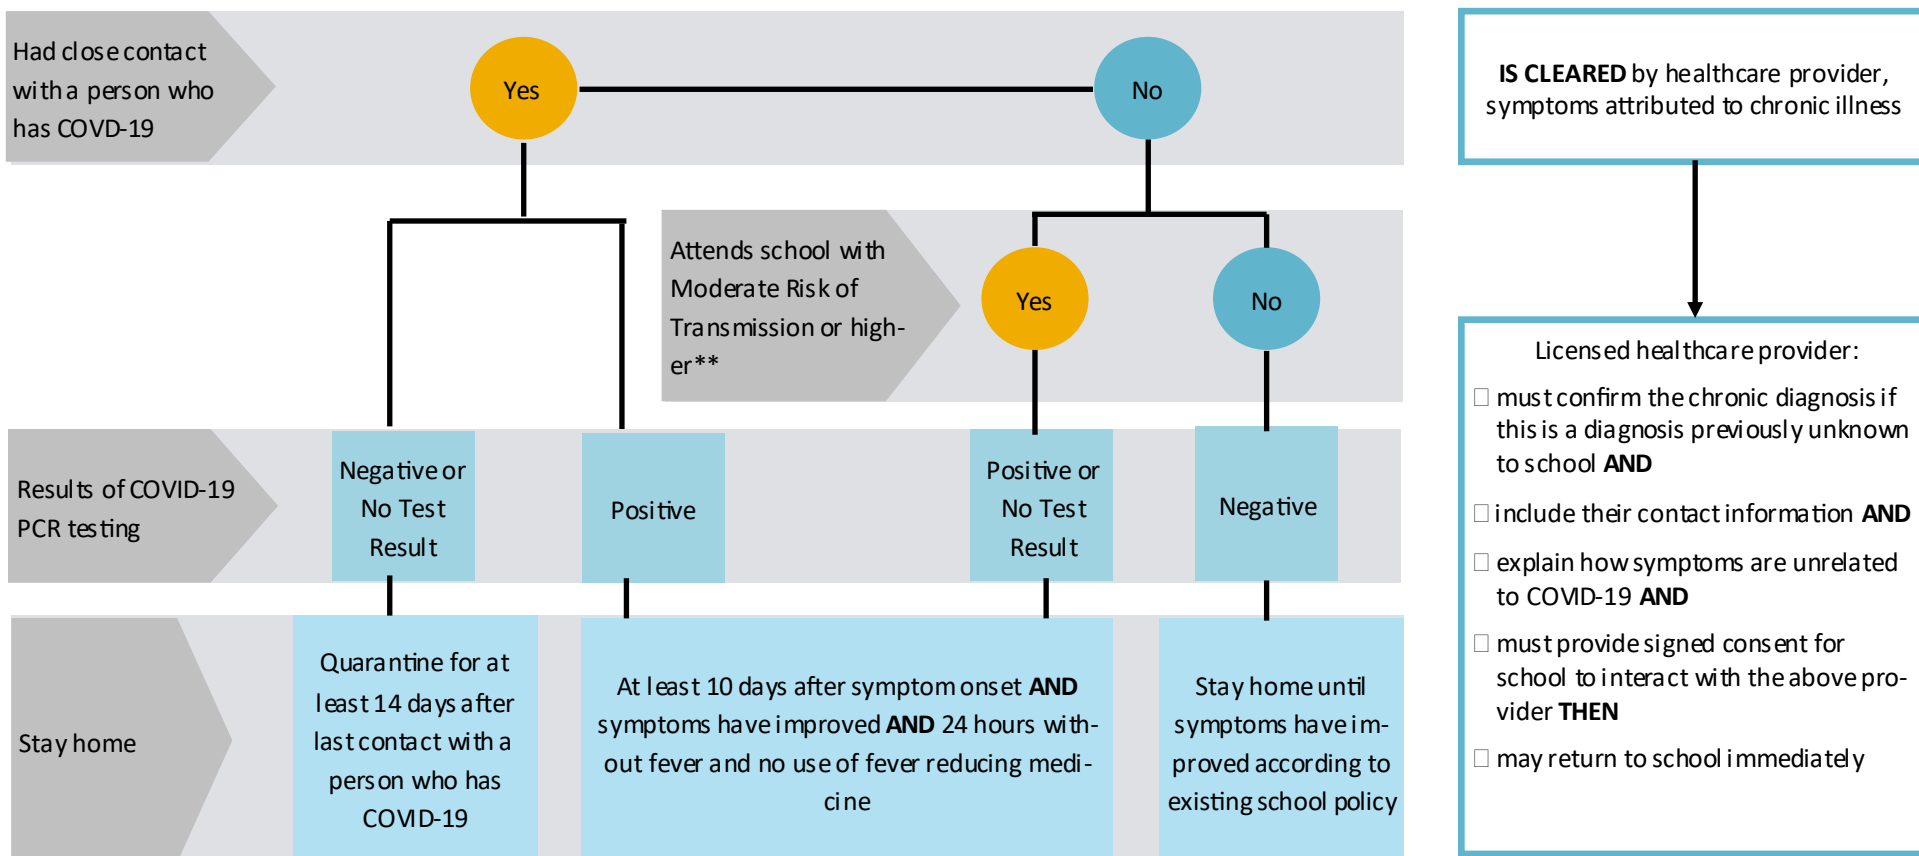

- Sore throat
- Fever, with or without rigors (chills) >100.0 F (37.8 C) that does not resolve within 30 minutes WITHOUT intervention
- Shortness of breath
- New loss of sense of taste or smell
- Cough*
- Headache*
- Nasal congestion (stuffy nose)*
- Rhinorrhea (runny nose)*
- Fatigue*
- Myalgias (body or muscle aches)*
- Nausea*
- Vomiting*
- Diarrhea*
- Loss of appetite or poor feeding*

Disregard the *symptom only if:

- school personnel are already aware of a chronic, pre-existing condition this student has experienced in the past **AND**
- current symptoms are consistent with the student's prior episodes, e.g. same presentation, severity **AND**
- symptoms are consistent with the underlying chronic condition and student has been cleared by healthcare provider

Staff to don appropriate PPE and isolate student or staff member until they can return home. Recommend follow up with health care provider.

Student with symptoms of infectious illness

*within 6 feet for a total of 15 minutes or more

**according to CDC's Indicators for Dynamic School Decision-Making
