Post Graduate Year 2 (PGY2) Pediatric Pharmacy Residency Program

Valley Children's Hospital offers a one-year PGY2 Pediatric Pharmacy Residency designed to provide pharmacists with advanced training and specialized clinical experience in pediatric pharmacy practice. The residency provides opportunities to develop a comprehensive understanding of pediatric pharmacotherapy across a variety of patient populations and practice settings while working closely with an interdisciplinary team of pediatric healthcare professionals. Residents will build upon their clinical knowledge and skills through direct patient care, longitudinal experiences, teaching, and professional development. In addition, the program emphasizes the development and completion of a longitudinal research project, providing residents with the opportunity to collaborate with pediatric clinicians, present their findings, and contribute to the pediatric pharmacy literature.

Period of Appointment: 12 months

Salary: Approximately \$104,000 annually, paid biweekly

Health Benefits: Full eligibility

Weekend Staffing: Residents must staff in the hospital pharmacy every other weekend

Responsibilities Include (but not limited to):

- Attend multidisciplinary medical rounds and provide drug information
- Identify a research project related to intensive care, propose it to the Valley Children's Investigational Review Board, carry out the study and present and publish the study
- Precept pharmacy students and residents on rotation at Valley Children's Healthcare
- Give presentations to medical and pharmacy staff and a didactic lecture to pharmacy students and residents
